

The Next Generation of Environmentally based Investment Risk Tools

Since the launch of the ground breaking Sigma ESG predictive risk assessment tool based upon the original highly successful Sigma Algorithm, which provides non prescriptive, non-exclusionary, quantitative ESG information with third party verification of claim, Sigma II now takes ESG risk definition to a whole new level. Financial Academia, ESG Researchers and ESG technical specialists have grappled with the subjective issues surrounding ESG, the quantification of seemingly disparate emotionally prompted information; these has facilitated the massive rise in or view our information pack [here](#).
